

ScaleHawk

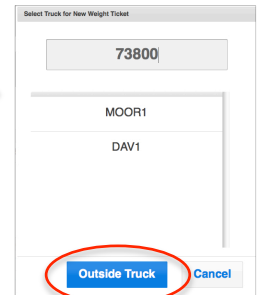

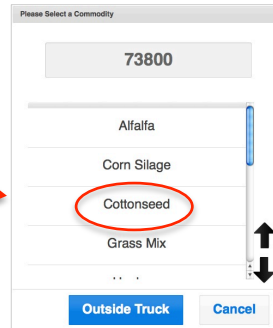

Directions for Saving a New Weight Ticket

Open a Weight Ticket

1. With the truck parked on the scale, touch "New Weight Ticket".

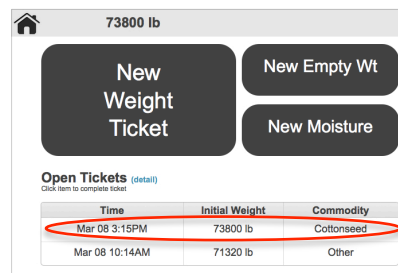

2. Touch "Outside Truck".

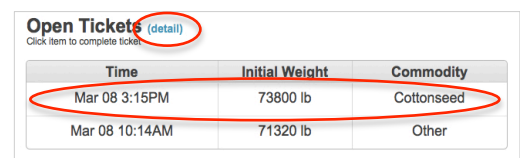

3. Select a commodity from the list (use arrows to scroll).

4. Notice the new ticket in the "Open Tickets" table.

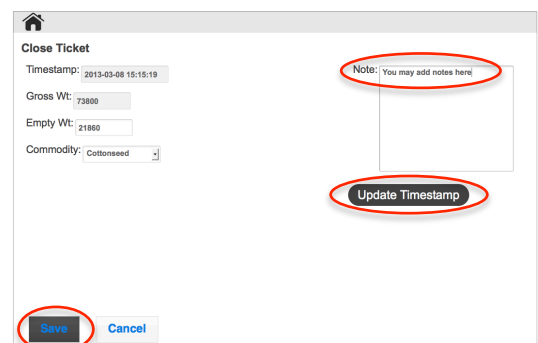

Close a Weight Ticket

5. With the truck on the scale, touch your ticket in the "Open Tickets" table. Touch "detail/more", if your ticket isn't shown.

6. ScaleHawk will automatically determine which weight is gross and which is tare. You may add notes, in the "Note" box. By default, the timestamp is when the ticket was opened. If you would like to change the timestamp, touch "Update Timestamp".

7. Then touch "Save" and that's it.
